Domain Name:

howtodigital.net

Project Description:

An educational website cares to deliver basics of digital design and electronics fundamentals for young students up to faculty and hobbyist levels.

The website shall contain educational materials such as text, pictures, videos, etc. Each topic will be inserted under main category. For example, the categories will include (but not limited to):

Those categories are subjected to be increased, decreased, moved, modified, or deleted upon the decision of the main administrator. The categories may be free to login by user to read all the topics underneath them or can be labeled as partially or fully paid before accessing them. Each category and topic can be rated (up to 5 stars) with adding comments under each category page and topic page.

P.S.: Payment is done through PayPal, Visa, or MasterCard (nonrefundable) with monthly basis (no yearly subscriptions).

The options available to **visitors**:

[1] Guests:
   - able to view the main page with all the links involved like payment, teamwork, contact details, etc.
   - able to view all the free to access topic within any category.
[2] Subscribed users (no payment yet):
   - after subscription, all data of users are saved in data base for marketing emails and promotions.
   - able to view the main page with all the links involved like payment, teamwork, contact details, etc.
   - also, able to view all the free to access topics within any category.

[3] Subscribed users (payment done for one up to 4 categories):
  - after subscription: all data of users are saved in data base for marketing emails and promotions.
  - able to view the main page with all the links involved like payment, teamwork, contact details, etc.
  - able to access topics within the paid for category they subscribed to

[4] Subscribed users (payment done for full access or more than 4 categories):
  - after subscription: all data of users are saved in data base for marketing emails and promotions.
  - able to view the main page with all the links involved like payment, teamwork, contact details, etc.
  - able to access topics within all the categories

The options available to **Admins**:

[5] Main admin has the ability to:
  - follow up with number of visitors for each page, topic, and create statistical sheets
  - add new categories and set payment plan for each individually (free, partially paid, fully paid)
  - modify existing categories (name, description, and included topic)
  - move or delete existing categories
  - add new topics under certain category and set payment plan for each individually (free, paid for)
  - modify existing topics (name, description, and contents)
  - move or delete existing topics
  - create, modify, or delete all banks of medias (pictures, videos, GIFs, files) for future use in the topics

[6] Other admin has the ability to:
  - follow up with number of visitors for each page, topic, and create statistical sheets
  - add new categories and set payment plan for each individually (free, partially paid, fully paid)
  - modify only created categories (name, description, and included topic)
  - move only created categories
  - add new topics under only created categories and set payment plan for each individually (free, paid for)
  - modify only created topics (name, description, and contents)
  - move or delete only created topics
  - create, modify, or delete certain bank of medias (pictures, videos, GIFs, files) for future use in the topics for the created categories

P.S.: These options are modifiable (upon agreement of recommendation by the website administrator and developer)
